

This table includes regions of low-quality coverage for the Maturity onset diabetes of the young (MODY) panel and therefore variant calling may be limited.

Gene	Genomic Region (Hg19)	Gene Region	Canonical Transcript
<i>EIF2AK3</i>	chr2:88926638-88926732	Exon 1	NM_004836.7
<i>GATA6</i>	chr18:19751739-19751977	Exon 2	NM_005257.6
<i>PDX1</i>	chr13:28498699-28498765	Exon 2	NM_000209.4
<i>PTF1A</i>	chr10:23481690-23482179	Exon 1	NM_178161.3

If you are a clinician and have a strong clinical suspicion of a disorder associated with a condition in a gene listed in this table, please contact the laboratory and additional orthogonal sequencing may be considered.
